CHAPTER 1

ENTER TITLE HERE

This is where your Introduction will go. There will be examples of figures, tables, citations, and footnotes in this section. In the source files, there will be examples and how to get them to appear on the TOC, LOF, and LOTs Some Diciplines use section and subsection headings more than others. The Chapter one is really all that matters. This is strictly to give the reader a sence of how they look on the TOC.

1.1 Your first section

How do you feel so far? In these next few subsections we are going to be illustrating how to do these different things in LaTeX. Hopefully you will be able to replicate it whenever you need them. It is good to have all of you images (figures) in their own folder so you can keep some organization to your projects.

1.1.1 Table Example

In this subsection, we are going to give an example of a table and how one will look. There are many ways to make a table and customize them. Here is one example:

left justified	centerd	right justified	no left border
row 1	fill	in between	the &s
row 2			

Table 1.1: The Caption of the table.

1.1.2 Figure Example

This is going to be an example of how to insert an image and it's caption. We can also reference it anywhere else in the document as well.

Figure 1.1: The Digital Humanities Lab Logo

1.1.3 Block Qoutes

1.1.4 Equation Example

1.1.5 Using Different Languages

You will need to be very familiar with this command and how it works. In this article, we see that Whitmire et al. (2019) has stumbled upon something that can change the world.

1.2 What About Paragraphs?

Some people will not need the sectioning that has been shown in the previous section. This section will give an overview of indenting and some spacing so you can create nicely spaced prargraphs.

All about Citations and BibTex

- 2.1 Works Cited Stlying
- 2.2 Inline Citations
